Profile

Motivated and ambitious junior Software Engineer with a growing interest in backend development and solid exposure to frontend fundamentals. Gained hands-on experience in building and maintaining simple web applications using modern development tools and programming languages. Passionate about writing clean, maintainable, and scalable backend code while continuously improving technical skills across the full development stack. Enjoys working collaboratively in team environments.

Projects

RetailMind POS System | *Spring Boot, FastAPI, PostgreSQL, React, AI*

- Developed a full POS system with a **Spring Boot** backend handling products, inventory, orders, offers, and role-based access.
- Built **Forecasting, Recommendation, and RAG-based customer service** modules using **Python + FastAPI**.
- Managed data persistence with **PostgreSQL** and versioned schema migrations using **Flyway**.
- Integrated backend and AI services with a **React** frontend via RESTful APIs.
- Tested and validated REST API endpoints using Postman during backend development.

Human Rights Monitor (MIS) | *FastAPI, MongoDB, React*

- Built the backend using FastAPI with MongoDB for managing reports, users, and system data.
- Developed the frontend with React, providing a responsive and user-friendly interface for reporting and viewing violations.
- Structured the project into modular components with clear separation between backend and frontend codebases.
- Documented RESTful API endpoints and ensured smooth integration between frontend and backend.

Birzeit Flat Rent System | *PHP, JavaScript, MySQL, HTML5, CSS3*

- Developed a comprehensive flat rental management system with three user roles (Customer, Owner, Manager).
- Designed a normalized MySQL database with 12+ interconnected tables using PDO prepared statements for security.
- Implemented secure authentication with PHP sessions, password hashing, and role-based access control.
- Built advanced search, image uploads, messaging system, and appointment scheduling features.

CarZone – Custom Steering Wheel Configurator (Freelance) | *React, TypeScript, Tailwind CSS, Spring Boot, PostgreSQL*

- Developing a full-stack platform for customizable steering wheels with dynamic pricing and vehicle-specific configurations.
- Built responsive customer and admin interfaces with REST APIs, PostgreSQL, and real-time configuration workflows.
- Collaborating directly with the client to translate requirements into functional, production-ready features.
- Worked on interactive 3D visualization for displaying customized steering wheel designs.

Technical Skills

Programming Languages: Java, Java Script , TypeScript , Python

Frameworks: Spring boot , React

Web Technologies: HTML, CSS , Tailwind CSS

Database Management: MySQL, XAMPP(PHP MyAdmin),Postgres SQL , MongoDB

Data Science Fundamentals: Data preprocessing, data cleaning, handling missing values, basic EDA

Tools: Git, GitHub , Postman ,Trello

AI-Assisted Development: GitHub Copilot, Cursor, ChatGPT, Claude - used for code generation, debugging, and improving development efficiency across projects.

QA: BlackBox , WhiteBox , Selenium

Operating Systems: Linux (Basic)

BI: PowerBI

Soft Skills

Problem Solving, Critical Thinking, Organizational and Time Management
Team Collaboration, Leadership, Effective Communication
Ability to Work Under Pressure, Adaptability

Education

Birzeit University	Sep. 2021 – Feb. 2026
<i>Bachelor of Computer Science</i>	<i>Ramallah, Palestine</i>
Kafer Malik Secondary School	Graduated: 2021
<i>Tawjihi</i>	<i>Rammallah, Palestine</i>
Score: 86.1%	

Certifications

Front End Web Developer Nanodegree With Palestine Launchpad with Google	2025
<i>Udacity</i>	

Languages

<i>Arabic</i>	<i>Native Language</i>
<i>English</i>	<i>Good</i>
